Personal statement

Civil and Structural Engineer with three years' experience at a leading consultancy, delivering steel and reinforced concrete structures across multidisciplinary projects. Experienced in producing coordinated, practical design solutions within programme and budget constraints, collaborating closely with architects, contractors, and other engineers. Recognised as a proactive and reliable team member who performs well under pressure while maintaining accuracy. Currently working towards ICE CEng chartership, with a commitment to developing technical expertise, professional judgement, and leadership skills.

Key Skills

- **Technical:** Structural design of steel and reinforced concrete, Eurocodes/UK standards, drawing and specification production.
- **Project & Professional:** Project coordination, stakeholder liaison, commercial awareness, mentoring junior engineers.
- **Software & Certifications:** AutoCAD, MIDAS, Microsoft Excel; ICE CEng in progress; Full UK driving license.

Professional Experience

Civil Engineer – Arcadis, Guildford & London | Sep 2022 – Present

- Designer and checker for M5 Junction 10 Improvements Scheme, delivering culverts, drainage structures, and 19 Category O/1 sign structures up to 12m tall.
- Conducted wind, fatigue, and foundation design to Eurocodes; standardised sign designs and promoted precast solutions, improving programme efficiency and reducing costs.
- Supported conceptual design and cost planning for 14 bridges on SR400 Express Lanes, undertaking structural calculations for RC C-bents and inverted T-caps to inform early-stage estimates.
- Delivered reinforced concrete culverts and ditch crossings with associated CDM risk documentation on HS2.

Projects

M5 Junction 10 Improvements Scheme | Dec 2024 – Dec 2025

Ancillary highway structures, culverts, drainage crossings, and 19 sign structures; design and checking to Eurocodes.

SR400 Express Lanes | Nov 2025 – Feb 2026

Concept-stage bridge design; structural calculations to support client cost estimates for 14 new highway bridges.

Jubilee Bridge | Mar 2026 – Present

Supervising expansion joint replacement and installation of a new waterproofing system; acting as client representative to ensure quality, compliance, and safe delivery.

Education

MEng Civil and Structural Engineering
University of Sheffield
Sep 2017 – Jun 2021

Interests & Hobbies

I enjoy the social aspects of sport and I love to stay active. I am the organiser of a weekly 5-a-side session with my friends and greater network.
